FOR RELEASE:

Thursday, May 2, 2002

HIGHLIGHTS OF SALINAS, CA NATIONAL COMPENSATION SURVEY OCTOBER 2001

Workers in the Salinas metropolitan area averaged \$19.04 per hour during October 2001¹, according to a new survey released by the U.S. Department of Labor's Bureau of Labor Statistics (BLS). Regional Commissioner Stanley Stephenson reported that white-collar workers averaged \$23.55 per hour and accounted for 50 percent of the workers in the area. Blue-collar employees averaged \$16.35 per hour and represented 17 percent of the workforce, while the remaining 33 percent worked in service occupations and earned \$14.11 per hour. (See table 1.)

The National Compensation Survey (NCS) presents straight-time earnings for occupations in establishments employing 50 or more workers in private industry and State and local governments. The survey excludes agricultural establishments, private households, the self-employed, and the Federal Government. This NCS covered 106 firms representing 45,600 workers in the Salinas metropolitan area, which includes Monterey County in California. Fifty-eight percent of those represented worked in private industry.

In the Salinas metropolitan area, average hourly wages were published for nearly 30 detailed occupations. (See table 1.) Among white-collar workers, registered nurses averaged \$30.33 per hour; editors and reporters, \$20.68; cashiers, \$15.25; and hotel clerks, \$10.04. Blue-collar occupations included mechanics and repairers, not elsewhere classified, earning \$16.84 per hour; laborers, except construction, not elsewhere classified, at \$11.27; and stock handlers and baggers at \$8.47. In the service occupations, public service police and detectives averaged \$28.76 per hour; janitors and cleaners, \$13.32; nursing aides, orderlies and attendants, \$10.38; and waiters and waitresses, \$8.82.

¹ Data were collected between September 2001 and January 2002; the average reference month is October 2001.

National Compensation Survey, Salinas, CA, October 2001 (continued)

The NCS also provides broad coverage of selected occupational characteristics. (See tables 2 and 3.) For example, full-time employees in the Salinas area averaged \$20.00 per hour and part-timers earned \$13.40. Union workers in blue-collar jobs averaged \$17.89 per hour, while their non-union counterparts made \$15.00. Private industry workers at establishments employing 50-99 workers averaged \$14.59 per hour and those in establishments with 500 or more employees earned \$21.18.

The NCS is part of a statistical program that will eventually integrate three separate surveys of wages and benefits into one comprehensive compensation program increasing the amount of data available. Data provided by the NCS may be used by businesses for establishing pay plans, making decisions concerning plant relocation, and in collective bargaining negotiations. Individuals may use such data to help choose potential careers. Average rates of pay are also available for levels of work within an occupation based on knowledge, skill, independent judgment, supervision received and other factors required on the job.

Survey Availability

Complete survey results are contained in the Salinas, CA, National Compensation Survey October 2001 (Bulletin 3110-50). While supplies last, single copies of the bulletin are available from the San Francisco Information Office by calling 415-975-4350. In addition, data contained in the bulletin are available on the Internet in both text and PDF formats at <http://www.bls.gov/ncs>. Select survey tables can also be obtained from the Bureau's fax-on-demand service in San Francisco by dialing 415-975-4567 and requesting document 9555.

For personal assistance or further information on the National Compensation Survey, as well as other Bureau programs, contact the San Francisco Information Office at 415-975-4350 from 9:00 a.m. to 11:00 a.m. and 1:30 p.m. to 4:00 p.m. pacific time.

1 Earnings are the straight-time hourly wages or salaries paid to employees. They include incentive pay, cost-of-living adjustments, and hazard pay. Excluded are premium pay for overtime, vacations, holidays, nonproduction bonuses, and tips. The mean is computed by totaling the pay of all workers and dividing by the number of workers, weighted by hours.

2 All workers include full-time and part-time workers.

3 A classification system including about 480 individual occupations is used to cover all workers in the civilian economy.

4 The relative standard error (RSE) is the standard error expressed as a percent of the estimate. It can be used to calculate a confidence interval around a sample estimate.

NOTE: Dashes indicate that no data were reported or that data did not meet publication criteria, and n.e.c. means "not elsewhere classified." Overall occupational groups may include data for categories not shown separately.

Table 2. Selected worker characteristics: Mean hourly earnings(1) by occupational group,(2) National Compensation Survey, Salinas, CA, October 2001

Occupational group	Private industry and State and local government					
	Full-time workers ³	Part-time workers ³	Union ⁴	Nonunion ⁴	Time ⁵	Incentive ⁵

1 Earnings are the straight-time hourly wages or salaries paid to employees. They include incentive pay, cost-of-living adjustments, and hazard pay. Excluded are premium pay for overtime, vacations, holidays, nonproduction bonuses, and tips. The mean is computed by totaling the pay of all workers and dividing by the number of workers, weighted by hours.

2 A classification system including about 480 individual occupations is used to cover all workers in the civilian economy.

3 Employees are classified as working either a full-time or a part-time schedule based on the definition used by each establishment. Therefore, a worker with a 35-hour-per-week schedule might be considered a full-time employee in one establishment, but classified as part-time in another firm, where a 40-hour week is the minimum full-time schedule.

4 Union workers are those whose wages are determined through collective bargaining.

5 Time workers' wages are based solely on an hourly rate or salary; incentive workers are those whose wages are at least partially based on productivity payments such as piece rates, commissions, and production bonuses.

NOTE: Dashes indicate that no data were reported or that data did not meet publication criteria.

Table 3. Establishment employment size: Mean hourly earnings(1) by occupational group,(2) private industry, National Compensation Survey, Salinas, CA, October 2001
